

Press release

Trade Republic expands from Brokerage to Wealth Management, enabling access to Private Markets. Start of strategic partnership with Apollo and EQT.

- With over 10 million customers and 150 billion euro in assets under management, Trade Republic expands its offerings from brokerage to wealth management. By the end of the year, the company will introduce three new, independent asset classes.
- To start, Trade Republic is introducing Private Markets, providing customers with access to this asset class through a partnership with Apollo and EQT
- Through its investment platform, Trade Republic customers can invest from 1 euro with fractional investing and have the option to sell monthly at the Trade Republic internal market place. This compares to the funds' minimum investment of 10,000 euro and quarterly redemptions.

Berlin, Sept 15, 2025 – Trade Republic, Europe's largest savings platform, continues to grow, surpassing 10 million customers, across 18 European markets and more than 150 billion euro in assets under management. Through strategic partnerships with Apollo and EQT, Trade Republic expands its services to offer access to Private Markets. In the coming months, the bank will roll out two additional asset classes, each 30 days apart.

"Long-term wealth creation is more than just an ETF savings plan. It's about the combination of various asset classes. Now, we are growing Trade Republic from brokerage into wealth management," says Christian Hecker, Co-Founder of Trade Republic. "Following our expansion into banking, with checking accounts and cards, this is the most significant milestone since our founding. With Apollo and EQT, we have secured two of the most important Private Markets managers as strategic partners for our customers."

This new offering gives Trade Republic customers the unique opportunity to invest in private companies, which account for 88 % of the economy. It allows retail investors to participate in the performance of these companies and further diversify their portfolios, noting that Private Markets are a long-term asset class, involving risks, including the potential loss of capital.

"Today, most individual investors' portfolios are limited to ETFs and shares of publicly listed companies – even though public markets only account for a fraction of the total investable economy. Through our partnership with Trade Republic, we are giving access to a global and diversified private markets portfolio via EQT's proven strategies – an opportunity historically reserved for institutional investors", says Peter Beske Nielsen, Global Head of Private Wealth & Evergreen Solutions at EQT.

In a professional wealth management strategy, stocks and ETFs typically make up only about 60 % of a portfolio. Private markets can help investors achieve greater diversification. With this new offering, Trade Republic is providing its clients with an asset class that was traditionally less accessible to retail investors.

“With this new partnership, combining Apollo's expertise with the innovative power of Trade Republic, we are addressing a much broader set of investors across Europe. Together we are pleased to build on the continued democratization of private markets,” says Veronique Fournier, Apollo's Head of EMEA Global Wealth.
